RBI ANNOUNCED

- RBI has permitted banks to give 3-month moratorium on term loans and EMIs
- Central bank has also slashed repo rate by 75 basis points
- Shaktikanta Das assured Indians that RBI is ready to tackle financial difficulties due to Covid-19 pandemic

The RBI’s MPC has voted in favour of an interest rate cut to the tune of 75 basis points, which brings the repo rate down to **4.4 per cent from 5.15 per cent**. The reverse repo rate has also been reduced by 90 basis points to 4 per cent in a bid to maintain financial stability and revive growth.

RBI Governor said that the outlook remains extremely uncertain at the time and going forward much will depend on how India battles Covid-19 pandemic. “The outlook is now heavily contingent upon the intensity, spread and duration of the pandemic. There is a rising probability that large parts of the world will slip into recession,”.

EMI, LOANS ON HOLD

It also announced that banks are permitted to allow a three-month moratorium for on payment of EMIs on all term loans that were outstanding on March 1.

"MPC noted that global economic activity has come to a near stand-still as Covid-19 related lockdowns and social distancing in affected countries. Expectations of a shallow recovery in 2020 from 2019's decade low in global growth have been dashed."

However, this means that the final decision to provide such a relief is in the hands of the banks. This is one of the key takeaways from RBI’s announcements as many people have been financially affected due to the lockdown implemented to prevent novel coronavirus from spreading in India. But it remains to be seen as to what extent this helps customers.

OTHER LIQUIDITY MEASURES

Apart from reducing key rates, the RBI also announced a slew of liquidity measures related to TLTRO, CRR and MLCR to ease mounting pressure. *(The targeted longer-term refinancing operations (TLTROs) are Eurosystem operations that provide financing to credit institutions. By offering banks long-term funding at attractive conditions they preserve favourable borrowing conditions for banks and stimulate bank lending to the real economy)*

"It has been decided to reduce the Cash Reserve Ratio (CRR) of all banks by 100 basis points to 3% of Net Demand and Time Liabilities with effect from the fortnight beginning March 28 for a period of 1 year," the RBI governor announced.

The announcement came just a day after the government unveiled a Rs 1.70 lakh crore relief package to shield poor people from the virus outbreak.
The RBI's relief measures announced in view of the Covid-19 pandemic stands at 3.2 per cent of the GDP.
