I-Lab

- The Minister for Science & Technology, Earth Sciences and Health & Family Welfare Dr Harsh Vardhan inaugurated and flagged off **India’s first I-Lab (Infectious disease diagnostic lab)** for Covid testing in **rural and inaccessible areas of India**.
- Expressing his happiness to launch the I-Lab, infectious disease diagnostic laboratory- a **mobile testing facility**, Dr. Harsh Vardhan dedicated this facility to provide Covid testing access to **rural India**.
- This mobile testing facility will be deployed through the **DBT testing hubs to remote regions** of the country for Covid testing.
- DBT is scaling-up testing for Covid by reorienting premiere laboratories as Covid testing centers in a **hub and spoke model**.
- There are now over **20 hubs in the country with 100 testing laboratories** and these have tested more than 2,60,000 samples.
- This has been possible through the **DBT-AMTZ COVID Command Consortia** (COVID Medtech Manufacturing Development] Consortia) to cope-up with the current situation in the country and move progressively towards a stage of self-sufficiency.
- **The I-lab** will be deployed through these hubs into remote and interior place.
- Today there are 953 testing laboratories in all corners of the country.
- Dr. Renu Swarup said on the occasion that through the concerted efforts Indian scientists, the country has achieved a capacity of producing nearly **5 lakh testing kits per day**, exceeding the target of having one lakh test kits by May 31, 2020.
- She pointed out that this I-Lab has been created in a **record time of 8 days** by the **Andhra Pradesh Med-tech Zone team** with the **support of DBT under the National Biopharma Mission** being implemented by the **Public Sector BIRAC**.
- She highlighted that the unit has biosafety facility and is capable of performing **RT-PCR as well as ELISA tests**.

**DBT-AMTZ COMManD**

- The Department of Biotechnology (DBT), Ministry of Science & Technology along with Andhra Pradesh Med-tech Zone (AMTZ) has **initiated the DBT-AMTZ COMManD [COVID Medtech Manufacturing Development] Consortia** to address the shortage of **critical healthcare technologies** in India and move progressively towards a stage of self-sufficiency.
- Under this Consortia, India’s first I-lab (infectious disease diagnostic lab) has been built at AMTZ in record time of 8 days from the date of receipt of **Automotive Chassis**, from Bharat Benz.
- This is a **mobile diagnostic unit with biosafety facility**.
- The I-lab is a **BSL-2 facility** with **on-site ELISA, RT-PCR, Bio chemistry analysers**.
- It can run **50 RT-PCR reactions and about 200 ELISA in a day**.
- Double set of Machines can help increase the capacity to about 500 per day in 8 hours shift.
- It can be deployed in remote areas and can be lifted from Automotive Chassis and can be put on goods train for sending to any location in the country.
The BSL -2 Lab is as per **NABL specifications** and is being attached to DBT's certified Testing centres.

The Department of Biotechnology (DBT), under the Ministry of Science & Technology, promotes and accelerates the development of biotechnology in India, including growth and application of biotechnology in the areas of **agriculture, healthcare, animal sciences, environment and industry.**

**AMTZ is Asia's first medical equipment manufacturing ecosystem**, uniquely dedicated for Medtech and supported by various Ministries.

**INFECTIOUS DISEASE DIAGNOSTIC LABORATORY (I-LAB)**

- To promote last mile access of testing to rural India, DBT under the Covid-Command strategy has supported building of mobile testing labs through AMTZ.
- The unique feature of these mobile testing labs is their utility in diagnosing other infectious diseases beyond the Covid period.

**Specifications**

- Automotive Chassis, Diagnostic Equipment, Clean Room, BSL-2 lab, bio-safety cabinets
- 25 Tests (RT-PCR) per I-Lab per Day
- 300 ELISA tests/day
- Additional test for other diseases for TB, HIV etc. to be costed as per CGHS rates.
