National River Conservation Plan

Under the National River Conservation Plan the river Sal project in Goa was sanctioned by the Ministry of Environment, Forest & Climate Change. The aim of the plan is to prevent pollution of rivers and improving water quality.

The activities under National River Conservation Plan include following:

- Sewage treatment plants for treating the diverted sewage.
- Low cost sanitation works to prevent the open defecation on riverbanks.
- Public awareness and public participation.
- Electric crematoria to ensure proper cremation of the bodies brought to burning Ghats.
