Seed Bankers for Conserving Native Crops

Till date 1597 plants varieties have been registered with Protection of Plant Varieties & Farmers Right Authority and certificates of registration have been issued.

National Bureau of Plant Genetic Resources

- ICAR-National Bureau of Plant Genetic Resources (NBGPR), New Delhi is conserving seed germplasm for long-term conservation (at -20°C) in its National Genebank (NGB).
- NGB has the responsibility of conservation of plant genetic resources for posterity and sustainable use including landraces and traditional varieties which are potential sources of agriculturally important genes.
