e-DantSeva

News

- Union Minister of Health and Family Welfare has launched the e-Dantseva website and mobile application.
- This is first-ever national digital platform on oral health information and knowledge dissemination.

Features

e-DantSeva contains information about the National Oral Health Program, detailed list of all the dental facility and colleges, Information, Education and Communication (IEC) material.

It contains a unique feature called the ‘Symptom Checker’, which provides information on symptoms of dental/oral health problems, ways to prevent these, the treatment modes, and also directs the user to find their nearest available dental facility (public and private sectors both).
Why such move?

- Dental caries/cavities and periodontal disease remain the two most prevalent dental diseases of the Indian population and dental infections have a potential for serious diseases/infections.
- Oral health is indispensable for the wellbeing and good quality of life.
